

Installation & Configuration Guide

Once BOFC is successful installed, below are some required configurations which need to DONE to use this application. It would take your few minutes.

Step 1: Once BOFC is installed in your system, navigate to BOFC app. Refer below screen (Refer Figure 1.0)

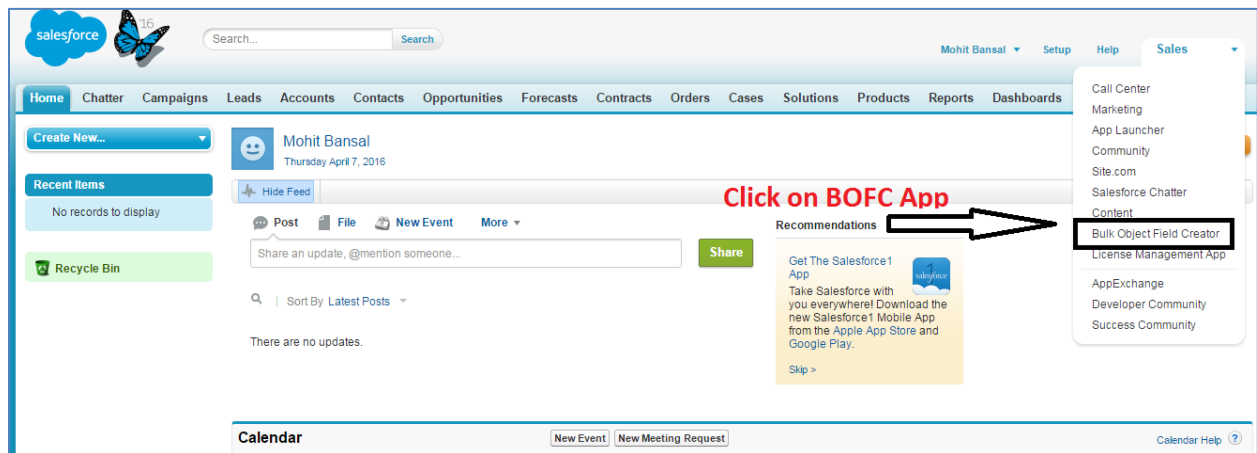

Figure 1.0

BOFC Home Page

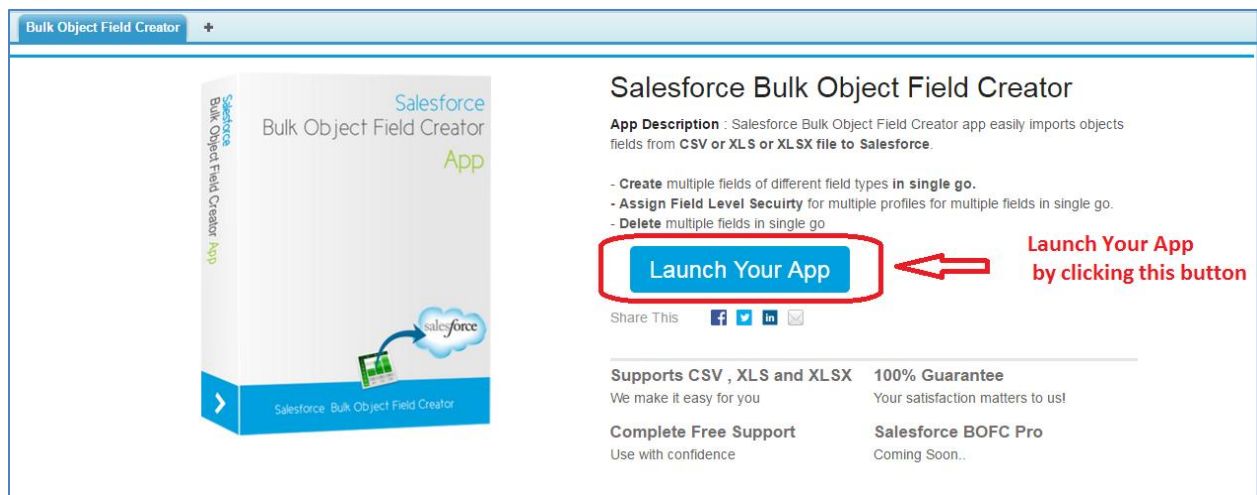

Figure 1.1

Click on **"Launch your App"** button

Step 2: Create Remote Site Settings (RMS)

As highlighted in this below (figure 2.0), you need to create 3 remote site settings.

The screenshot shows the 'Bulk Object Field Creator' interface. A modal dialog titled 'Configure Remote Site Settings(RMS)' is open, prompting the user to create RMS and check boxes. The dialog contains the following text:

Please create RMS and check below boxes once you are done(One-time activity):

- ☐ Does <https://ap2-api.salesforce.com> exist?
- ☐ Does <https://ap2.salesforce.com> exist?
- ☐ Does <https://bofc.ap2.visual.force.com> exist?

Below the checkboxes is a 'Done' button. A note at the bottom of the dialog states: '* Note: If any of the above settings does not exist, then Goto Setup > Administer > Security Controls > Remote Site Settings and create NEW

The background interface includes a sidebar with 'Enter Basic Information', 'Enter Object Details', and 'Create New Fields'. The main area has a table with columns: Status, Error Description, Type, Field Label, Field Name, Length, Decimal Places, # Visible Lines, Picklist Values, Picklist Sorted, Default Value, Required, Unique, External Id, Description, and Help Text. A red banner at the top indicates 'Free version. For Unlimited access Click Here'.

Step c: Fill below fields as guided below

Remote Site Name : You can assign any name

Remote Site URL : You need to copy the URL displayed in the RMS popup Box as shown in your BOFC app page.

Once you fill the information, click Save

Remote Site Edit

Enter the URL for the remote site. All s-controls, JavaScript OnClick commands in custom buttons, Apex, and AJAX proxy calls can access this Web address from salesforce.com.

Remote Site Edit Save Save & New Cancel

Remote Site Name

Remote Site URL

Disable Protocol Security ☐

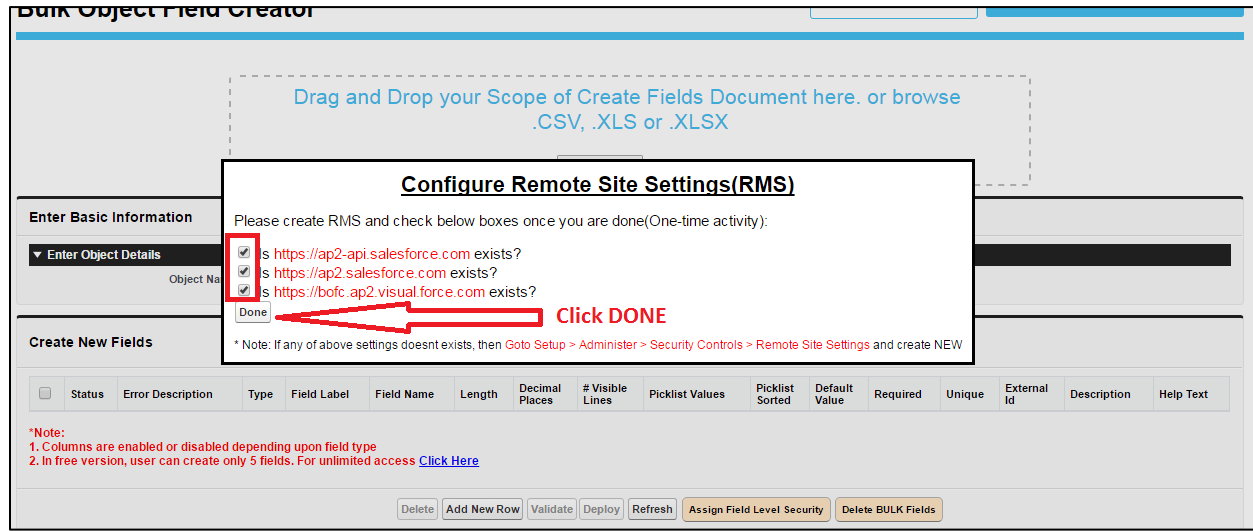

Description

Active ☒

Save Save & New Cancel

NOTE: You need to follow the same steps for all the three URL's, to create 3 Remote Site Settings.

Step 3: Once you create all the three remote site settings as per step 2, then check all the checkboxes and Click **DONE**

Bulk Object Field Creator

Drag and Drop your Scope of Create Fields Document here. or browse .CSV, .XLS or .XLSX

Configure Remote Site Settings(RMS)

Please create RMS and check below boxes once you are done(One-time activity):

- ☒ <https://ap2-api.salesforce.com> exists?
- ☒ <https://ap2.salesforce.com> exists?
- ☒ <https://bofc.ap2.visual.force.com> exists?

Click DONE

* Note: If any of above settings doesnt exists, then Goto Setup > Administer > Security Controls > Remote Site Settings and create NEW

<input type="checkbox"/>	Status	Error Description	Type	Field Label	Field Name	Length	Decimal Places	# Visible Lines	Picklist Values	Picklist Sorted	Default Value	Required	Unique	External Id	Description	Help Text
--------------------------	--------	-------------------	------	-------------	------------	--------	----------------	-----------------	-----------------	-----------------	---------------	----------	--------	-------------	-------------	-----------

*Note:
1. Columns are enabled or disabled depending upon field type
2. In free version, user can create only 5 fields. For unlimited access [Click Here](#)

Step 4: Configuration Completed. Now you can use this app.
